

Avid Resources New Name. Proven Team.

Introducing Avid Resources

Avid Resources is the new name for a long-established and highly successful team driving an extensive network of major resource and industrial operations throughout Australia.

In acquiring RCR's Resources, Power and Water (West) divisions in February 2019, the AvidSys Group signalled an exciting new chapter for the team you know and trust – with a clear mandate to use our unparalleled experience to continue delivering our industry-leading solutions, directly to our clients.

Our integrated business model continues to allow our clients to access a significant depth of project resources through a single contractor interface. It also provides a wider pool of expertise for us to draw on when we allocate project resources. This ensures a greater amount of collective experience and skill is concentrated on every challenge.

Part Of The Avidsys Group A Global Business Network

The Avidsys Group is an international group of businesses, founded and owned by an Australian-Indian family network. It combines some of the world's leading industrial, natural resources and financial enterprises, working together towards the delivery of a common strategy.

- Integrated business model encompasses metals and mining; construction and infrastructure development; industrial automation; media; substantial property portfolio; IT and business consulting.
- A collaborative and innovative approach which is **transforming businesses** and communities through commercialisation of new technologies
- Avidsys recognised that our reputation has been built on the cornerstones of people and performance –and a commitment to delivering projects which foster open communication and promote **long-term client relationships**.

An Integrated Solution From Inspiration to Operation

Avid Resources is a multi-disciplinary business providing market-leading construction and maintenance for metals & minerals projects; end-to-end electrical, instrumentation and control solutions; and extensive design, civil, mechanical and electrical experience across water treatment plants & waste water treatment facilities.

We are able to combine and leverage these capabilities, successfully delivering fully integrated structural, mechanical and electrical construction, installation, maintenance and E&I and shutdown projects. We have a proven track record built on our collaborative approach and a fundamental commitment to safety, reliability, quality assurance and responsiveness to dynamic and changing requirements.

Regional Presence

Avid maintains a network of strategically located regional branches servicing major resource centres in Western Australia, South Australia and New South Wales.

We offer full service options from minor works, maintenance and service capabilities, through to major projects and we have fully equipped engineering workshops to support site-based activities.
